DURETI KADIR
Full Stack Developer

Maple Valley, WA| 425-436-4731| duretikadir22@gmail.com | [GitHub](#) | [LinkedIn](#)| [Portfolio](#)

Summary

- Around **4+ years** Strong Experience as a **Front-end developer** with proven expertise in developing and designing user-friendly, cross-browser compliant websites, and User Interface (UI) applications using **HTML5, CSS3, Bootstrap, JavaScript, NodeJS, ReactJS,** and **Redux**
- Certified Full stack developer with **Node.js, Express.js, React.js, JavaScript, CSS, HTML, Bootstrap, MySQL, MongoDB, Progressive Web Applications (PWAs),** Model-View-Controller **(MVC),** Object-Relational Mapping **(ORM),** Object-Oriented Programming **(OOP), MERN Stack, GitHub,** and **Heroku**
- Utilized **Bootstrap** framework to create responsive and visually appealing user interfaces ● Collaborated with the team to design and implement user-friendly features and functionalities ● Designed and developed dynamic web pages from start to finish using **HTML/HTML5, CSS/CSS3, jQuery**, and **single-page applications (SPA)**
- Developed and implemented front-end web applications using **HTML, CSS, React,** and **JavaScript**
- Integrated APIs to enhance the functionality of web applications and improve user experiences ● Implemented **TDD, PWAs, MVC, ORM,** and **OOP**
- Followed the **Model-View-Controller (MVC)** architectural pattern to structure and organize code
- Utilized **Git, GitHub**, and **GitLab** for version control and collaborative development
- Worked with **Node.js** and **Express.js** to build server-side components and **RESTful APIs** ● Implemented client-side interactivity using **jQuery** and **react** for dynamic and interactive user experiences. ● Designed and maintained databases using **MySQ**L and **MongoDB** for data storage and retrieval ● Good understanding of **Object-Oriented Programming (OOP**) and **Functional Programming (FP)** ● Expertise at working with **RESTful Web Service** and third-party API to implement **AJAX calls, fetch**, and **Axios** along with **JSON format data**
- Ensured cross-browser compatibility and responsiveness of web applications
- Managed **multiple tasks** and prioritized them effectively to meet project deadlines
- Stayed up-to-date with industry trends and emerging technologies to enhance skills and knowledge in web development.

Education

RIFT VALLEY UNIVERSITY, ASSOCIATE'S DEGREE **| 2020 - 2021** Pharmacy

UNIVERSITY OF WASHINGTON, FULL STACK WEB DEVELOPER CERTIFICATE
EdX Coding Bootcamp

Skills

LANGUAGES	JAVASCRIPT, TYPESCRIPT
DATABASE	MYSQL, NOSQL / MONGODB
METHODOLOGIES	AGILE
FRONT END	HTML/HTML5, CSS/CSS3, REACT.JS, REDUX, HOOKS, JEST, AXIOS, JAVASCRIPT, HTML, CSS, ANT DESIGN, BOOTSTRAP, JSON
BACK END	NODE.JS, EXPRESS, RESTFUL API
IDE	VISUAL STUDIO CODE
PACKAGE CONTROL	GIT, GITHUB, HEROKU
OPERATING SYSTEM	WINDOWS, LINUX, MAC

Experience

MCKINSEY & COMPANY | REMOTE | <mark>SEP 2022 – CURRENT</mark> FRONT END DEVELOPER
- Designing and implementing the web application using **HTML5, CSS3, Bootstrap, React, Redux**, and **AJAX** with **RESTful** web service
- Experienced with Software Development Life Cycle **(SDLC)** with object-oriented business processes and worked on developing Service-oriented architecture applications in an agile development environment
- Utilizing **React.js** and React Router in the development for building single page applications **(SPA)** and consuming RESTful web services
- Developing custom **WordPress themes** and templates using **HTML, CSS, JavaScript,** and other front-end technologies
- Experience consuming **JSON-**based **RESTful APIs UI/UX**
- Implementing **Redux** for state maintenance and actions dispatch
- Design and develop resilient **REACT** components for customer-facing web applications
- Added **redux** as middleware to handle actions with promise payloads in order to dispatch resolved data to the front end
- Handled responses and logged the entries to the **MySQL,** and **MongoDB** databases, Implementing MongoDB and application route
- Implementing responsive web design and mobile-friendly design using Bootstrap grid system and CSS media query
- Good understanding of object-oriented design, data structures, algorithm design, problem-solving, & complexity analysis
- Communicate frequently with the backend team for **API** requirement issues and data passing standards
- Adopted Git as a version-controlling tool Commit, merge branches, and push codes on **Git**
- Working in an **Agile environment,** attending regular meetings monthly and weekly for requirement issues and ticket dispatch
- Involved in design reviews and perform code reviews based on clients' engineering rigor and standards
- Making day-to-day decisions on the implementation of specific features, adhering to best practices and design guidelines

PRO-SOLVE SYSTEMS PLC| ADAMA, ETHIOPIA | FEB 2019 – MAY 2022 FRONT END WEB DEVELOPER

- Build web pages using semantic **HTML5, SCSS, JavaScript,** and other **modern front-end technologies** ● Involved in d**esigning** and **implementing** the web application using **HTML5, CSS3, Bootstrap, React, Redux**, and **AJAX** with **RESTful web service.**
- Used **AJAX** to request **JSON** data from the back-end API and showed the data on the screen in the tables and charts.
- Implemented **MongoDB** and application route.
- Adopted **Git** as a version-controlling tool, Commit, merge branches, and push codes on Git, and communicate frequently with the backend team for **API** requirement issues and data passing standards.
- Test, diagnose, and repair, many **front-end bugs**, or issues
- Implemented Redux for state maintenance and actions dispatch.
- Good understanding of asynchronous request handling, partial page updates, and **AJAX**
- Dealing with backend technologies and **APIs** as well.
- Maintain clear file organization and output, ensuring code is written following modern best practices.

Projects

WEATHER DASHBOARD | [Live](#)
- Built with server-side API, JavaScript, HTML, and CSS. Using the 5-Day Weather Forecast API, it presents current and future weather conditions for a specific city on a dynamically generated card.

TEAM PROFILE GENERATOR| [GitHub](#)
- Built with Node.Js and OOP, it is a Node.Js command-line app that takes in information about employees /team and generates an HTML webpage that displays summaries of each person.
